Experience

Senior Developer

Acumera, Inc

Apr 2018 - Apr 2021 (3 years 1 month)

Maintained and developed software for a proprietary managed firewall tool for convenience stores. AcuVigil software provides a dashboard for any sensor-capable function in a convenience store (gas tanks, freezers, cash registers, etc.) and utilizes AWS as the hosting platform, as well as a bespoke server on-site. (Linux, Apache, MySQL, PHP, HTML, CSS, SASS, Javascript, jQuery, MongoDB, AWS)

Polymath

Bulltiger Productions, LLC

Jul 2015 - Feb 2018 (2 years 8 months)

Designed and developed software for proprietary contract management tool. PHP, HTML, CSS, SASS, Javascript, jQuery, MongoDB)

Developer

MicroVentures

Feb 2015 - Jul 2015 (6 months)

Project management and development on an in-house investment tracking system. Preliminary work on modernization and re-development of the same, mostly database redesign. Design work including landing pages and site updates. Launch management and system administration. (Linux, Apache, MySQL, PHP, Javascript, HTML, CSS, SASS)

Developer

Securimate

Aug 2014 - Dec 2014 (5 months)

Development work on an enterprise-level compliance application for Fortune 500/1000 companies. Conversion from legacy PHP (pre-OO) to PHP 5.4 (OO) and some work with Javascript. (Linux, Apache, MySQL, PHP, Javascript)

Software Engineer

Bulltiger Productions, LLC

May 2013 - Jun 2014 (1 year 2 months)

responsible for web presence for a game company startup, and various other projects as requirements demand. Developed preliminary architecture for an armory site, development of a social and scorekeeping server software for a third-party mobile game, and development work on mobile games. System management on non-Windows machines. (Linux, Apache, MySQL, PHP, HTML, CSS, REST, SASS, Less, XML, XSLT, Javascript, jQuery, NodeJS,

ExpressJS, MongoDB)

Owner

The Outrage Factory

May 2013 - Present (9 years 11 months)

Independent web design and web application development, focusing on responsive web applications for mobile and desktop. Currently working with WordPress for content management, Shopify for e-commerce, and some custom LAMP stack software.
